

Risk Assessment

Practical approaches to COVID-19 Risk Assessments

The first recommended approach to COVID-19 risk assessment is a hazard analysis. [Paraphrase here](#) the core principles and then COVID-19 specific.

The following recommended approach to COVID-19 risk assessment involves a hazard analysis, a risk analysis, and a control plan. When the risk is high, a control plan is required, and the risk is reduced.

Identify the hazard	<p>The hazard is a COVID-19 infection in a person.</p> <p>Some of the common ways in which COVID-19 is spread are through direct contact with an infected person, through respiratory droplets, and through contact with contaminated surfaces.</p>
Identify who can be harmed	<p>The hazard can harm people who are in contact with the infected person, who are in contact with contaminated surfaces, and who are in contact with respiratory droplets.</p> <p>_____</p> <p>_____</p> <p>_____</p> <p>_____</p> <p>_____</p>

<p>Decide the level of risk (with control measures)</p>	<p>To assess the level of risk, consider the following factors:</p> <ul style="list-style-type: none"> The nature of the activity and the number of people involved. The location of the activity and the ventilation of the space. The duration of the activity and the frequency of contact between people. The health status of the people involved. The effectiveness of the control measures in place. <p>Assess the risk based on the above factors and determine the level of risk (low, medium, or high).</p>
<p>Review existing measures that may need to be strengthened</p>	<p>Consider the following measures that may need to be strengthened:</p> <ul style="list-style-type: none"> Physical distancing measures. Hand hygiene and respiratory hygiene measures. Use of face masks. Regular cleaning and disinfection of surfaces. Use of UV-C light for disinfection. Restrictions on large gatherings. Restrictions on international travel.
<p>Keep your workforce and people informed</p>	<p>Make sure that your workforce and other people involved are kept informed of the current risk level and any changes to control measures.</p> <p>Use appropriate communication channels to provide clear and concise information.</p>
<p>Stay up to date with guidance</p>	<p>Keep up to date with the latest guidance from the relevant authorities regarding COVID-19 risk management.</p> <p>Regularly review and update your risk assessment and control measures based on the latest guidance.</p>
<p>Keep a record</p>	<p>Keep a record of the risk assessment, the control measures in place, and any changes made.</p> <p>Review the record regularly to ensure that the risk assessment and control measures remain effective.</p>

Different types of COVID-19 Risk Assessments

Since the beginning of the pandemic, many organizations have created their own risk assessment frameworks to manage the risks of COVID-19.

The following are some of the risk assessment frameworks that have been used to manage the risks of COVID-19 and their respective strengths.

One of the most common frameworks used is the **Swire Car's Facility Group**. It is a risk assessment framework that is based on the **Facility Group** concept. It is a risk assessment framework that is based on the **Facility Group** concept.
